

HERAmbiente

HERAMBIENTE SERVICES ACROSS EUROPE

IF YOUR PLANTS COULD TALK, THEY WOULD CHOOSE HERAMBIENTE

Every day, our well-established relationships lead us to several countries across Europe. We ensure that our foreign partners receive a constant and reliable supply of dedicated waste, which, while complying with all applicable regulations, contributes to the maximum efficiency of their facilities. We do it seriously, thanks to the waste of over 6,400 companies we serve in Italy.

We also facilitate our European partners' access to new markets, by including their output in the offers with which we bid in public tender procedures held in Italy. To this, we add the solidity of the great organization we belong to, Hera Group, one of Italy's leading multiutility companies, capable of generating a gross operating margin above 1.5 billion euros.

Whatever **waste**
you can treat,
we can deliver.

Whatever **quantity**
you need,
we can source.

Whatever supply
frequency you want,
we can provide.

Whatever **certification**
you require,
we can meet.

HERAMBIENTE

Herambiente, a Hera Group company, is **the leading Italian operator in the waste sector** in terms of the volume of waste it treats and the number of facilities it operates. It sustainably deals with the **entire municipal and industrial waste management cycle**, offering integrated solutions **to over 6,400 companies**. With its **90 certified plants**, Herambiente can treat any type of hazardous and non hazardous waste, with excellent performance in terms of efficiency and reduction of environmental impact.

Herambiente is 75% controlled by Hera and 25% by EWHL, European Waste Holdings Limited, a company incorporated under British law, 50% owned by 3i Managed Infrastructure Acquisitions LP, a British infrastructure fund, and 50% by the Dutch pension fund Stichting Pensioenfond ABP.

▶ **Revenues over 1 billion euro**

▶ **About 7 million tonnes of waste managed per year**

▶ **Over 145 GWh of thermal energy produced per year**

▶ **More than 5 million tonnes of special waste managed per year**

▶ **Over 915 GWh of electricity produced per year**

▶ **Over 700,000 tonnes of waste potentially destined for export**

THE HERA GROUP

Founded in 2002, the Hera Group is now among the main Italian multiutility and provides **environmental, water, and energy services**, as well as **public lighting** and **telecommunications**.

Operating throughout Italy and mainly in the North-East of the country, Hera serves **more than 300 municipalities** and **employs over 10,000 people**. Today, more than 7.5 million citizens, around 13% of the Italian population, use at least one service provided by the Group.

Hera has been part of the **Ftse MIB index**, which includes Italy's 40 leading listed companies, since 2019, and in 2020 it was included in the Europe and World indices of the Dow Jones Sustainability Index (now Dow Jones Best-in-Class Index).

INNOVATION

Carbon Fibre Recovery Plant - Fib3r

Herambiente recycles carbon composite materials at its FIB3R plant. The regenerated fiber retains its well-known characteristics of lightness and high strength, ready to be reused for all the typical applications of virgin fiber.

Rigid plastics processing plant - Aliplast

Herambiente has built one of Europe's most innovative plants for recycling rigid plastics, which are among the most complex materials to process. The process is based on upcycling: a regeneration technology that elevates the quality of the starting polymer to make it comparable to virgin material and reusable in high-performance sectors.

HERAMBIENTE SERVICES

INDUSTRIAL WASTE Hazardous and Non-Hazardous

Steelmaking and metalworking

Chemical industry

Mass retail

Leather and fur

Refineries

Pharmaceuticals
